RESPONSE TO COMMENT FORM

Session/Semester: 2025/2026-2

Instruction: [Student] - Please complete sections A and B and present this to SV and evaluators with the Report Correction Form.

SECTION A: Student and project info

Name: Ahmed Hani Ahmed Ghaleb	
Project Title: Al-Muneer Hall Portal	
Supervisor: Dr. Muhammad Luqman Bin Mohd Shafie	
Project Type: Development - Web	Matric. No.: A21EC9120
E-mail ahmedahmed@graduate.utm.my	Add.: No. Tel/HP: 01112344710
Examiner 1 Name: AP Dr. Radziah bt. Mohamad	Examiner 2 Name: Dr. Mohd Razak bin Samingan
Date: 17/07/2026	Signature: <i>Ahmed</i>

SECTION B: Response to Comment

#	Comment from Evaluators	Response to comment
1	[Examiner 1] Bad formatting of Table of	SRS, SDD, and STD tables are now

	Contents.	following UTM thesis format (the same as in the main report), plus, mapped links for easy jumping to the desired content
2	[Examiner 1] Bad formatting of the report. Follow the UTM Thesis format.	I did a lot of improvements to page numbers, 1.5 line spacing to all paragraphs, and most notably the Table of Content. Sorry for the previous mess, I got overwhelmed with the test cases
3	[Examiner 1] Rewrite the "Why Chosen" column in Table 2.2; remove informal AI-style filler and non-academic quotes.	Totally replaced with data-backed justifications instead of my opinions.
4	[Examiner 1] Alternative and Exception flows in the use case specifications are not explicitly triggered from conditional steps within the Normal Flow. Use Visual Paradigm to model the sequence diagram and all requirements diagrams.	Added exception flow to all use cases including updating 32 diagrams activity and sequences diagrams. And adding a 17 th use cases for Gemini integration. As for Visual paradigm, I couldn't install it on my Linux machine, however all sequence and activity diagram are stating explicit triggers from conditional steps. I hope this up to your expectations
5	[Examiner 1] Add GeminiAI as one of the actors in the use case diagram and the AI function as one of the use cases.	Added a 17 th use cases as requested, updated the use case diagram in the Main report and SRS.
6	[Examiner 2] Project objectives are too long, too verbose, and include implementation details; rewrite them (objective 1 as suggested).	They're now more concise and neatly written.
7	[Examiner 2] Set paragraph line spacing to 1.5.	Done, dr.
8	[Examiner 2] Booking page shows a button labelled "Submit Inquiry".	All "Submit Inquiry" are now "Submit Booking " to avoid confusion, updated in both the project code and project report.
9	[Examiner 2] Not user-friendly to check a booking: users must remember and enter the given reference number.	Introduced another look-up option based on the Whatsapp number of the booking
10	[Examiner 2] Many issues with UI/UX and task flow.	Dr Luqman and I have discussed the UI/UX and iterated through it until it got shaped to the landing page shown in the demo. If I can get instruction on how I improve the UI/UX more, I'd gladly do so.
